

(a) Chamfer distance cost vs. KL divergence cost

□ gt: (0.5, 0.5, 0.4, 0.4, 0)
 □ res: (0.5, 0.5, 0.4, 0.4, 0.25)
 $\mathcal{D}_{KL}(\text{gt}, \text{res}) = 0$
 $\mathcal{D}_{cf}(\text{gt}, \text{res}) \approx 0.433$ (ours)

(b) Chamfer distance cost vs. L1 distance cost

□ gt: (0.3, 0.4, 0.4, 0.1, 1/18)
 □ res1: (0.7, 0.8, 0.4, 0.1, 1/18)
 □ res2: (0.3, 0.4, 0.4, 0.1, 17/18)
 $\mathcal{D}_{L1}(\text{gt}, \text{res1}) = 0.8$
 $\mathcal{D}_{L1}(\text{gt}, \text{res2}) = 8/9 \approx 0.89$
 $\mathcal{D}_{cf}(\text{gt}, \text{res1}) \approx 0.82$ (ours)
 $\mathcal{D}_{cf}(\text{gt}, \text{res2}) \approx 0.1$ (ours)

(c) Chamfer distance cost vs. Hausdorff distance cost

□ gt: (0.5, 0.5, 0.4, 0.3, 0)
 □ res1: (0.5, 0.5, 0.4, 0.1, 0)
 □ res2: (0.5, 0.53, 0.4, 0.16, 0)
 $\mathcal{D}_{Haus}(\text{gt}, \text{res1}) = 0.1$
 $\mathcal{D}_{Haus}(\text{gt}, \text{res2}) = 0.1$
 $\mathcal{D}_{cf}(\text{gt}, \text{res1}) = 0.2$ (ours)
 $\mathcal{D}_{cf}(\text{gt}, \text{res2}) = 0.14$ (ours)
